Summary

AWS Cloud Practitioner certified professional with a strong foundation in cloud computing, AWS services, and modern application deployment. Skilled in deploying scalable and highly available cloud environments while applying principles of security, fault tolerance, and performance optimization. Possess a solid background in software development using JavaScript, ReactJS, and MySQL, enabling effective collaboration between development and cloud operations teams. Eager to contribute to cloud infrastructure, support, and deployment initiatives while continuously expanding expertise in AWS technologies.

Technical Skills

- **Cloud:** AWS Services (EC2, S3, RDS [Aurora, MySQL], Auto Scaling, Load Balancing, Elastic Beanstalk, VPC Fundamentals, IAM Fundamentals, CloudWatch [Basic])
- **Languages:** JavaScript, Reactjs, TailwindCSS
- **Developer Tools:** Git, GitHub, VS Code
- **Core Competencies:** Cloud Computing Fundamentals, AWS Infrastructure Management, EC2 Instance Provisioning & Management, Cloud Storage Management (Amazon S3), Networking Fundamentals (TCP/IP, DNS, VPN, VPC), Security Groups & Access Management (IAM Basics),

Work Experience

FREELANCING, Collaborate
Full-Stack

Remote 10/2024 - Current

Project: Quiztians – Bilingual Quiz Web Application

- Developed and delivered a bilingual (English & Tamil) quiz platform for a non-profit organization to support educational initiatives.
- Built responsive and interactive UI using ReactJS, Framer Motion, and React Router, ensuring seamless user experience across devices.
- Implemented role-based authentication and secure access control using Supabase.
- Designed and developed key features including timed quizzes, real-time score tracking, and leaderboards.
- Collaborated with stakeholders to gather requirements and iterate features based on feedback.
- Successfully deployed the application, improving accessibility and engagement for users.

Technologies: ReactJS, JavaScript, Supabase, Framer Motion, Tailwind CSS

Internships and Certificates

NTTF
AWS Cloud Foundations, AWS Cloud Practitioner

Bangalore 02/2026 - 03/2026

- Gained a strong understanding of cloud computing concepts, AWS global infrastructure, and various deployment models (IaaS, PaaS, SaaS).
- Built and managed scalable cloud-based application environments using core AWS services.
- Understood concepts of high availability, scalability, and fault tolerance in designing cloud solutions.

ExcelR – Ai Variant
Java Full Stack Development

Bangalore 08/2023 - 05/2024

- Gained hands-on experience with ReactJS, MySQL, Git, and Java.
- Built responsive web applications integrating front-end and back-end functionalities.
- Completed a 3-month capstone project cloning a real-world website using ReactJS and MySQL.
- Strengthened teamwork, version control, and agile development practices.
- Technologies: JavaScript, ReactJS, Tailwind CSS, MySQL, Java, Git

Projects

Scalable Web Application Deployment on AWS

- Deployed a web application using Amazon EC2 and Amazon S3. Configured Auto Scaling Groups to handle varying workloads automatically.
- Implemented Elastic Load Balancer (ELB) for traffic distribution and high availability. Utilized Amazon RDS (Aurora MySQL) for managed database services.
- Configured security groups and networking settings for secure access.

HR Portal (2025)

[Deployment link](#)

- Developed a web-based recruitment management platform using React, TailwindCSS, and Supabase.
- Implemented features for secure resume uploads, candidate profiles, and recruiter dashboards.
- Designed responsive layouts and authentication workflows for HR and candidate users.

BookMyShow Clone Website (2024)

[Deployment link](#)

- Created a ticket booking platform clone using ReactJS, Tailwind CSS, and JavaScript.
- Integrated Node.js backend and MySQL database for real-time data management.
- Focused on clean UI, modular architecture, and efficient API integration.

Education

Jain University,
B.Tech in Computer Science and Engineering

Bengaluru
08/2019 - 06/2023

CGPA: 7.39 / 10

Relevant Coursework: OOPS, Databases, DSA, Operating Systems, Web Development, Computer Networks, Machine Learning
